CH2M HILL Plateau Remediation Company (Geotech)
825 Jadwin Avenue
Richland, WA 99354
Attn.: L.C. Sumner

Subject: Geotechnical Laboratory Testing Services, Data Deliverable for SDG # W904019, Rev. 0

Enclosed is the final report on geotechnical analyses performed by RJ Lee Group for Sample Delivery Group number (SDG #) W904019.

General Set Comments
RJ Lee Group received from CH2M-Hill Plateau Remediation Company (CHPRC) 1 sample(s) to be tested for geotechnical analysis at the Columbia Basin Analytical Laboratories. There are no SIRs associated with this SDG.

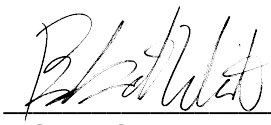
The CHPRC sample, in COC # F19-027-147, has been assigned a RJLG Geotechnical Lab Sample number per the below table.

CHPRC Sample #	SDG #	Geotechnical Lab Sample #	Date Processed
B3P331	W904019	W904019	05/06/2019

This project deliverable, provided in Attachment 1, contains the reports of the requested analytical results and a copy of the associated chain of custody for the sample listed above.

The analytical results provided in this deliverable relate only to the items tested. The sample was received in acceptable condition unless otherwise noted in the attached report(s).

I certify that this analytical report is in compliance with the Hanford SOW, both technically and for completeness. Release of the data contained in this hard copy report has been authorized by the Laboratory Director or a designee as verified by the following signature.



5/9/2019

Robert White L.G. Date
Licensed Geologist, Columbia Basin Analytical Laboratories

REPORT OF LABORATORY TESTING

Report to:	CH2M Hill Plateau Remediation Company (Geotech) LC Summer 825 Jadwin Avenue Richland, WA 99352 (509) 376-6427	**Date:**	**5/2/2019** **Sample Delivery Group No.:** F19-027 **Sample Authorization No.:** 303492
Project:	300-FF-5 Uranium Sequestration Post-Injection Boreholes - Soil	**Project No.:**	F19-027-147
Report of:	Grain Size Analysis - Hydrometer (ASTM D422)	**Lab Technician:**	Veronika Vazquez

Items Received:
One sample was provided to us containing soil material obtained by you, the client.
Test performed:

Particle/Grain Size Analysis - Hydrometer (ASTM D422):
Mechanical Grain Size Analyses (wet sieve) were conducted on each of the soil samples to determine their grain size distribution. In addition, hydrometer tests were conducted on portions of the soil samples passing the No. 10 sieve. The results of the mechnical grain size analyses and hydrometer testing are plotted on the attached Figure (Particle Size Analysis Test Results - Hydrometer, pages 1 through 3).

LABORATORY TEST RESULTS

Particle Grain Size Analysis - Hydrometer (ASTM D422) - Sieve Portion

Customer Sample Number	Laboratory Sample Number	Percent Passing by Sieve Size											
		3-in.	1½-in.	¾-in.	⅜-in.	No. 4	No. 10	No. 20	No. 40	No. 60	No. 100	No. 140	No. 200

REPORT OF LABORATORY TESTING

Report to:	CH2M Hill Plateau Remediation Company (Geotech) LC Summer 825 Jadwin Avenue Richland, WA 99352 (509) 376-6427	**Date:**	5/6/2019
		Sample Delivery Group No.:	F19-027
		Sample Authorization No.:	303492
Project:	300-FF-5 Uranium Sequestration Post-Injection Boreholes - Soil	**Project No.:**	F19-027-147
Report of:	Soil Density (ASTM D2937-10)	**Lab Technician:**	Robert White

Items Received:
One sample was provided to us containing soil material obtained by you, the client.
Test performed:

Standard Test Method for Density of Soil by the Drive-Cylinder Method (ASTM D2937-10)
This test method covers the determination of in-place density of soil. The test method involves obtaining a relatively intact soil sample by driving a thin-walled cylinder and the subsequent activities for the determination of in-place density. This test method is limited to the procedures necessary for obtaining specimens suitable for determining the in-place density and water content of certain soils. (Soil Density)
