Report Qualifiers:

- B = Inorganics and Wetchem: The analyte was detected at a value less than the PQL but greater than or equal to the MDL. The data should be considered usable for decision making purposes.
- C = The analyte was detected in both the sample and the associated QC blank, and the sample concentration was <= 5X the blank concentration. The data should be considered usable for decision making purposes.
- D = Analyte was reported at a secondary DF, typically DF > 1 (i.e., the primary preparation required dilution to either bring the analyte within the calibration range or to minimize interference). Required for organics/wetchem if the sample was diluted.
- H = Laboratory holding time exceeded before the sample was analyzed.
- N = Spike and/or spike duplicate sample recovery is outside control limits
- O = All: The associated LCS recovery is outside control limits
- U = The constituent was analyzed for and was not detected. The data should be considered usable for decision making purposes.
- X or Y or Z = The result-specific translation of this qualifier code is provided in the data report and/or case narrative.
