**Subject: Chemical Analysis Report, SDG Number: RJLG25C0341**

Columbia Basin Analytical Laboratories received 16 sample(s) on 05/14/25 for analysis. These sample(s) have been assigned a login order number of W505189, SDG number RJLG25C0341. Enclosed is the final report that consists of a summary report of the sample(s), and a copy of the chain of custody. If provided by customer on COC, sample volume is recorded on the laboratory report and has been used to calculate final results.

**General Lab Comments**

The results provided in this report relate only to the items tested. Sample(s) were received in acceptable conditions unless otherwise noted in the comments above. Sample(s) have not been field blank corrected unless otherwise noted in the general set comments above. Results included in the report apply to the sample as it was received. Information provided by customer can affect validity of results. The sample(s) were prepared and analyzed in compliance with EPA 7196A. This test report shall not be reproduced, except in full, without written approval of Columbia Basin Analytical Laboratories. Any questions, please contact our office.

We certify that this data package is in compliance with the SOW, both technically and for completeness, including a full description of, explanation of, and corrective actions for, any and all data deviations, from either the analyses requested or the case narrative requested. Release of the data contained in this data package has been authorized by the Laboratory Director or a designee and the laboratory's client service representative as verified by their signatures on this report. This report has been technically reviewed by the following individual:

Report Qualifiers:

- B = Inorganics and Wetchem: The analyte was detected at a value less than the PQL but greater than or equal to the MDL. The data should be considered usable for decision making purposes.
- C = The analyte was detected in both the sample and the associated QC blank, and the sample concentration was <= 5X the blank concentration. The data should be considered usable for decision making purposes.
- D = Analyte was reported at a secondary DF, typically DF > 1 (i.e., the primary preparation required dilution to either bring the analyte within the calibration range or to minimize interference). Required for organics/wetchem if the sample was diluted.
- H = Laboratory holding time exceeded before the sample was analyzed.
- N = Spike and/or spike duplicate sample recovery is outside control limits
- O = All: The associated LCS recovery is outside control limits
- U = The constituent was analyzed for and was not detected. The data should be considered usable for decision making purposes.
- X or Y or Z = The result-specific translation of this qualifier code is provided in the data report and/or case narrative.
