3. Comments:

200-E-360-PL-B represents the portion of the original site located in the B Farms-1 SQUID (Subsequent Units for Individual Development).
The waste site is a carbon steel pipeline that carried waste cooling water from the 241-BY-254 Control House and Compressor to the waste cooling water drywell (WIDS 200-E-359). The waste cooling water drywell received drainage from floor drains and condensate drains associated with the 241-BY-254 Building. No documented reports of contamination could be located; however, due to the building's location within the tank farm fence, the potential for contamination does exist.

4. Is the site a Solid Waste Management Unit?	Yes	No
Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released *(for example through spills)*, and includes dangerous waste treatment, storage, and disposal units.	☒	☐

5. Does the site need to be addressed under a regulatory program? Check the first item that applies.

General Description *(see TPA-MP-14 for definitions)*	Unit Category	Classification	Check Here
Site specifically exempted from WIDS based on section 2.0 of TPA-MP-14	Not Applicable	Not Accepted	☐
Permitted RCRA TSD that will be addressed under a RCRA/CERCLA Coordination	RCRA/CERCLA Coordination TSD	Accepted	☐
Permitted RCRA TSD	RCRA TSD	Accepted	☐
Waste site that will be addressed as part of the closure of a RCRA TSD	RCRA TSD Related	Accepted	☐
Waste disposal unit or unplanned release unit where radioactive or dangerous waste is present or possibly present	CERCLA Remedial/Removal Action	Accepted	☒
Inert waste or limited purpose landfill *(WAC 173-350-410 or WAC 173-350-400)*	Inert Waste or Limited Purpose Landfill	Accepted	☐
Solid waste landfill *(WAC 173-350)*	Solid Waste Landfill	Accepted	☐
Petroleum UST or contaminated soil from a petroleum UST leak *(WAC 173-360)*	Petroleum UST	Accepted	☐
Underground injection well that received non-contaminated effluent *(e.g., storm water runoff, steam condensate, air conditioner condensate) (WAC 173-218)*	Underground Injection Control Well	Accepted	☐
Other liquid disposal site with a State waste discharge permit *(WAC 173-216)*	State Waste Discharge	Accepted	☐
Septic system for which there is not expectation or radioactive or dangerous waste discharge *(WAC 246-272A or WAC 246-272B)*	Septic	Accepted	☐

DISCOVERY SITE EVALUATION CHECKLIST (Continued)

6. Assign the site to an operable unit or waste management area. Write 'Not Applicable' if neither applies.	200-EA-1

7. Ecology and EPA Approvals:

Ecology Project Manager:

Tabitha Liebrecht

8. Are any other activities needed or desired at the site? Only answer if no items in question 5 were checked. Check the first item that applies.

General Description *(see TPA-MP-14 for definitions)*	Unit Category	Classification	Check Here
A location where remediation is not needed, but debris removal or other miscellaneous restoration activities may be performed	Miscellaneous Restoration	Accepted	☐
A location where no remediation, miscellaneous restoration, permit closure, or other physical *(e.g., waste site remediation)* or administrative *(e.g., permit closure*) activity is needed	Not Applicable	Not Accepted	☐

9. DOE Approval:

DOE Federal Project Director:

Kelly Ebert
