Subject: Chemical Analysis Report, SDG Number: RJLG25C1110

Columbia Basin Analytical Laboratories received 13 sample(s) on 12/17/25 for analysis. These sample(s) have been assigned a login order number of W512229, SDG number RJLG25C1110. Enclosed is the final report that consists of a summary report of the sample(s), and a copy of the chain of custody. If provided by customer on COC, sample volume is recorded on the laboratory report and has been used to calculate final results.

General Lab Comments

The results provided in this report relate only to the items tested. Sample(s) were received in acceptable conditions unless otherwise noted in the comments above. Sample(s) have not been field blank corrected unless otherwise noted in the general set comments above. Results included in the report apply to the sample as it was received. Information provided by customer can affect validity of results. The sample(s) were prepared and analyzed in compliance with EPA 300.0. The working analytical concentration for samples prepared by this method is a 2x dilution of the digestate. This test report shall not be reproduced, except in full, without written approval of Columbia Basin Analytical Laboratories. Any questions, please contact our office.

Report Qualifiers:

B = Inorganics and Wetchem: The analyte was detected at a value less than the PQL but greater than or equal to the MDL. The data should be considered usable for decision making purposes.

C = The analyte was detected in both the sample and the associated QC blank, and the sample concentration was <= 5X the blank concentration. The data should be considered usable for decision making purposes.

D = Analyte was reported at a secondaryDF, typically DF>1 (i.e., the primary preparationrequired dilution to either bring theanalyte within the calibration range or to minimizeinterference). Required for organics/wetchem if the sample was diluted.

H = Laboratory holding time exceeded before the sample was analyzed.

N = Spike and/or spike duplicate sample recovery is outside control limits

O = All: The associated LCS recovery is outside control limits

U = The constituent was analyzed for and was not detected. The data should beconsidered usable for decision making purposes.

X or Y or Z = The result-specific translation of this qualifier code is provided in the data reportand/or case narrative.
