July 11, 1991

Ms. Joan Kessner
Westinghouse Hanford Company
2355 Stevens Drive
Richland, Washington 99352

Dear Ms. Kessner:

Analytical Results on Project EN52C: 618-9 Burial Ground Trench Samples

Attached are the anion results on one (1) 618-9 Burial Ground Trench soil sample, Project EN52C, received into the Analytical Chemistry Department (ACD) laboratories on May 25, 1991. Also attached are copies of the Chain of Custody records for the sample. The Westinghouse Chain of Custody was signed as relinquished by J. Demarest but not signed as received at the time of shipping. The Cooler Receipt Form verifies receipt at the ACD laboratories on May 25, 1991. The sample was entered into the AnaLis system as being received on May 28, 1991.

The AnaLis ID number is 910530-001 for sample number BOOY82. EPA Method 300.0 was utilized to perform the analysis for chloride, nitrate, and sulfate anions in accordance with agreements between the OSM and K-25 ACD. As previously requested in the letter dated December 20, 1990, the results are reported in ACD's AnaLis report format. All data quality objectives were satisfied on this project.

SEP 1996
RECEIVED
EDMC

I certify that this data package is in compliance with the terms and conditions of the OSM's revised Statement of Work and letter dated December 20, 1990, both technically and for completeness, for other than the conditions stated above. Release of the data contained in this hard copy data package has been authorized by the Laboratory Manager or his designee, as verified by the following signatures.

Sincerely,

Deborah L. Amburgey
