Ms. Joan Kessner
Westinghouse Hanford Company
2355 Stevens Drive
Richland, Washington 99352

Dear Ms. Kessner:

Analytical Results on Project EN52C: 618-9 Burial Ground Trench Samples

Attached are the results on the 618-9 Burial Ground Trench sample, Project EN52C, received into the Analytical Chemistry Department (ACD) laboratories on May 31, 1991. Also attached are copies of the Chain of Custody records for the samples, a sample identification table, and a summary of the protocol utilized to perform these analyses in accordance with agreements between the OSM and K-25 ACD. As previously requested in the letter dated December 20, 1990, the results are reported in ACD's AnaLis report format. All data quality objectives were satisfied on this project.

The Martin Marietta Chain of Custody received with the sample was incomplete and did not contain the required signatures. However, the Westinghouse Hanford Chain of Custody received with the sample did contain all the required signatures. It was unclear to the Sample Management receiving custodian as to whether the dates and times were all complete.

Wet Chemistry: Anions

The anion analysis for chloride, nitrate and sulfate was conducted in accordance with EPA-300.0 methodology.

I certify that this data package is in compliance with the terms and conditions of the OSM's revised Statement of Work and letter dated December 20, 1990, both technically and for completeness, for

9613491.1077

other than the conditions stated above. Release of the data contained in this hard copy data package has been authorized by the Laboratory Manager or his designee, as verified by the following signatures.

Sincerely,

Deborah L Amburgey
