Subject: FW: NRTC Agenda/Biological Controls

Teri,

Please forward this message to the trustees. Thanks.

Jamie

Folks,

Requests for contractor presentations at NRTC meetings need to be coordinated through me and the appropriate RL program. In the case of the proposed biological controls presentation, I contacted the RL Program Manager after I saw the request to put it on the agenda. We agreed that this is an appropriate issue to present, but Lowell is not the place for it. Due to the travel requirement and the cost inefficiency of sending someone all the way to Lowell for a relatively short presentation, we're saving this particular presentation for the next Tri-Cities meeting.

Jamie

Subject: RE: NRTC Agenda

I assumed Dan would contact Ray. How about Thursday morning?

Subject: RE: NRTC Agenda

Please advise. Are we adding him to the agenda? If so, when, how long?

Who will contact Ray?

Teri

Subject: NRTC Agenda

Trustees,

I had asked Ray Johnson of Fluor Daniel several weeks ago to give a presentation at our NRTC meeting in Lowell. He was going to talk about biological control issues at Hanford waste sites and had agreed to limit his comments to only CERCLA sites if we desired. I had submitted this information to Tom and Terri on at least two occasions to make sure he got on the agenda.

I noticed yesterday that on the draft agenda that we were sent that Ray was not included. I called Ray and he indicated that he was still willing to come and that he had not been contacted.

I think Ray's presentation would be good and I think we need to put him on the TH morning agenda. If you look at the agenda for this next meeting, Jamie is leading the majority of the discussions. I think that when we can we should lessen that load by having others also present.

Any comments, please get back to me. I called Tom but he is out of town. As Vice Chair I am requesting that Ray be added to the agenda.

Thanks,

Dan
