Dear Mr. Rodrigeuz:

Re: Closure In Place of Petroleum Underground Storage Tank #6652-C

The Washington State Department of Ecology (Ecology) has reviewed all closure documentation for tank #6652-C provided by the United States Army Corps of Engineers. Closure of this tank occurred in December 1994. This is a steel tank with an approximate 6000 gallon capacity, which held diesel throughout it's operational life. Given the remoteness of the tank's location and the potential for disturbing valued historical land, Ecology concurs that closing in place was appropriate and at this time requires no further action be taken.

If contamination is uncovered through future remedial actions taken in or around the location of this tank, removal under WAC-173-360 and soil removal under WAC-173-340, may still be required.

If you have questions or concerns, please contact me at (509) 736-3012.

Sincerely,

Ted A. Wooley
Underground Storage Tank Manager
Nuclear Waste Program
