**Re: Request for Hanford Site Underground Storage Tank Program  
Integration Presentation**

Dear Mr. Stewart:

General Topics Action Item #GT.86 calls for a presentation to be made to Ecology and EPA on "integration and coordination of programs". This presentation is scheduled for the March 20 Unit Manager's Meeting. Ecology requests that the Underground Storage Tank Program at Hanford be on this agenda.

The issue of remediation of underground storage tanks and operable unit past practice investigations first came to light regarding tanks found within the 100-HR-1 Operable Unit. Since then information concerning other tanks within and outside of operable units has come to our attention.

Informal conversations and meetings between USDOE and Ecology on this matter indicate some improvement is necessary to assure that these two programs are better integrated and coordinated. This presentation should be of value to all parties as we discuss requirements under RCW 90.76, the NCP, the Hanford Federal Facility Agreement and Consent Order and USDOE internal orders.

We look forward to developing a policy for implementing this program that all parties will find acceptable. If you have any questions, please call me at (206) 438-7018. Thank you.

Sincerely,

Larry Goldstein  
CERCLA Unit Supervisor  
Nuclear & Mixed Waste Management
