Mr. Douglas R. Sherwood
Hanford Project Manager
U.S. Environmental Protection Agency
712 Swift Blvd., Suite 5
Richland, Washington 99352

Dear Mr. Sherwood:

SAMPLING AND ANALYSIS PLAN FOR THE REDOX PLUTONIUM LOADOUT HOOD, DOE/RL-97-75

Attached are three copies of the Sampling and Analysis Plan for the REDOX Plutonium Loadout Hood for your review and comment. The Tri-Party Agreement requires a 30-day review for Sampling and Analysis Plans.

The Sampling and Analysis Plan is based on the data quality objective process and describes the general sample location, minimum number of required samples and identifies the specific contaminants of potential concern and related analysis. The Sampling and Analysis Plan does not define the exact sample locations and equipment to be used in the field due to the nature of unknowns associated with the loadout hood.

If you have any comments or require additional information, please call me on 372-2282.

Sincerely,

John P. Sands, Project Manager
Decontamination and Decommissioning Project

DDP:JPS
